- Solar and heatpump ready models available on request
- Low or mains pressure cylinders available

[Valve kit not included.](#)

Water Cylinders: Vertical SS Mains Pressure Cylinder

The design of our product is not based on any other cylinder on the market. We went back to the drawing board and designed a cylinder with features not seen before. Water temperature display, on/of timer settings and as a minimum standard IPX4 rated and a stainless steel tank. We also made sure that there was no "wasted space" between the inner tank and the outer shell and used a high density insulation to make our cylinder very energy sufficient.

If you are still not sure if this product is suitable for your needs, we could arrange for a rep to come out to your place for a free assessment. A quote on installation could also be arranged.
