Description

Application

High pressure system to protect downstream components eg. Water filters, drink dispensers, ice makers, coffee machine and reverse osmosis machines.

Feature / Benefits

The FMP valve (actetyl plastic) has quick and simple John Guest fittings for speedy install.

Dual checks prevent backflow making the valve ideal for reverse osmosis units, fridges with ice makers and coffee machines.

The filtermate protects water filters by limiting water pressure to the filter (avoiding costly water damage in the house).

Specifications

- Inlet: 1/4" John Guest connector
- Outlet: 1/4" John Guest connector
- Length: 98mm

Valves: Filtamate Pressure Limiting Valve

- Flow rate: 14 L/min at 700 kPa inlet pressure
- Outlet pressures: 350 and 600 kPa +/- 10% @ 1000KPa inlet pressure.
- Pressure ratio: 10:1 (for every 10 kPa increase in inlet pressure above 1000 kPa, the outlet pressure will increase by 1kPa).
- Maximum inlet pressure: 1600 kPa
- Maximum tempature: 40 C
- Minimum tempature: 1 C
- FMP supplied with fixing clip and screw
- FMP: Acetyl plastic
